# WHAT IS THIS PRODUCT?

Euro Medium Term Note in bearer form. It has no capital protection against market risk.

Objectives:

The objective of the Credit Linked Note is to provide you with an enhanced return in exchange for taking the default risk of the Reference Entity (FedEx Corp. Bloomberg Code FDX US Equity). FedEx Corporation delivers packages and freight to multiple countries and territories through an integrated global network. The company provides worldwide express and freight delivery, ground small-parcels, less-than-truckload, supply chain management, customs brokerage services, trade facilitation and electronic commerce solutions. The product provides for a call feature which allows the Issuer, at its sole discretion, to redeem the product early on the Early Redemption Dates at the respective Early Redemption Amount. If during the life of the Credit Linked Note, a Credit Event occurs in relation to the Reference Entity, the product will be redeemed early at the Credit Event Redemption Amount per Specified Denomination. If neither an early redemption nor a Credit Event has occurred the product will be redeemed on the Redemption Date in cash at 125% per Specified Denomination.

In addition to the consequences that result from the occurrence of a Credit Event or an early redemption, the product terms provide that if certain events occur, adjustments may be made to the product. These events are specified in the final terms and principally relate to the Underlying, the product and the Issuer of the product. The return (if any) you receive on such early termination is likely to be different from the scenarios described below and may be less than the amount you invested.

All redemptions described in this document (including potential gains) are calculated on the basis of the Notional Amount, excluding costs, social contributions and taxation applicable to this type of investment.

In the event of bankruptcy or restructuring of the issuer (Banque et Caisse d'Epargne de l'Etat, Luxembourg), imposed by the resolution authority in order to avoid bankruptcy, you run the risk of not recovering the sums to which you are entitled and partially or totally lose the amount invested. The right to redemption of 125% of the capital invested is not applicable in the event of disinvestment (i) before the date of early redemption, (ii) after the occurrence of a Credit Event Redemption Date or (iii) before the final maturity date, under the condition that there has not been an early redemption or a Credit Event has occured. The product does not pay any interest in the form of coupons.

## PERFORMANCE SCENARIOS

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 5 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances. This type of scenario occurred for an investment in the Underlying between November 2019 and November 2024.

Investment of 10 000 US	SD				
Recommended holding period : Until the product is redeemed early or matures. This may be different in each scenario and is indicated in the table.					
Scenarios		If the investor exits after 1 year	If the investor exits on maturity.		
Minimum	There is no minimum guaranteed return. You could lose or all of your investment.				
Stress scenario	What you might get after costs	USD 8.869,00	USD 3.950,00		
	Average annual return	-11,31%	-16,95%		
Unfavourable scenario	What you might get after costs	USD 8.869,00	USD 12.448,00		
	Average annual return	-11,31%	4,48%		
Moderate scenario	What you might get after costs	USD 8.869,00	USD 12.448,00		
	Average annual return	-11,31%	4,48%		
Favourable scenario	What you might get after costs	USD 8.869,00	USD 12.448,00		
	Average annual return	-11,31%	4,48%		

The figures shown include all costs of the product itself, but may not include all the costs, that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Your maximum loss would be that you will lose all your investment.

## WHAT HAPPENS IF BANQUE ET CAISSE D'EPARGNE DE L'ETAT, LUXEMBOURG IS UNABLE TO PAY OUT?

In the event of bankruptcy or restructuring (e.g. bail-in) of the issuer, pursuant to Directive 2014/59/EU, you run the risk that the capital initially invested will only be reimbursed partially, or even not at all, at maturity. In this case, you also run the risk that the capital gain will not be paid. This product cannot be considered as a deposit and is therefore not protected under the Luxembourg deposit protection system.

# WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. The duration of the product is uncertain as it may terminate at different times depending on how the market evolves. The amounts shown consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here.

We have assumed:

- USD 10.000 is invested
- A performance of the product that is consistent with each holding period shown.

	If the product is called at the first possible date	If the product reaches maturity and no Credit Event Redemption Date has occurred.		
Total costs	50 USD	50 USD		
Annual cost impact ( <sup>*1</sup> )	0,5 %	0,1%		
(*1) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at maturity your average return per year is projected to be 4.56% before costs and 4.46% after costs.

# HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

#### Recommended holding period: until final maturity.

Under normal market conditions, Banque et Caisse d'Epargne de l'Etat, Luxembourg (Spuerkeess) ensures a daily secondary market throughout the life of the product by providing purchase and sale prices expressed as a percentage of the nominal value and the difference between the buy and sell prices (the spread) will not be greater than 1% of this nominal value. If you wish to sell this product before the maturity date, the price of the product will depend on the evolution of market parameters at the time of release. In this case, this could put the invested amount at risk.

## HOW CAN I COMPLAIN?
